

The Overlake School Summer

Summer Virtual Camp + Kit

"Summer Virtual Camp + Kit" provides project-based, enrichment opportunities that students can complete independently and safely from their own homes. These new camps will follow the same weekly structure that we've utilized in the past, with half-day camps starting each Monday from June 15-July 3. These camps include:

MATERIALS KIT: A package that parents/guardians pick-up from campus on Monday (the first day of camp). The kit will include all materials that campers need for the project(s) they will complete throughout the week. Overlake will follow CDC and public health recommendations when packaging and distributing materials.

TEACHER COMMUNICATION: A synchronous meeting or asynchronous video from the teacher at the start of each day. The meeting will provide guidance on the day's project and/or activity. Campers will also be able to connect with the teacher for follow-up questions and support as needed. Campers will need to have internet access and a device in order to participate in virtual sessions.

COLLABORATION: A forum for students to share their work, engage with their peers, and get feedback from the teacher.

We will have the new camp schedule posted on our website by **Friday, May 22**. Registration for these new camps will open at that time. Registration for each camp will close one week before the start date, and a minimum of ten campers need to register for a camp to run.

Each one-week, half-day camp costs \$100.
